

Amendment to significant Agreement – Decision of the President of the UKE regarding flat interconnection rates for Multimedia Polska S.A.

Current report no 51/2007 dated 24 August 2007

With reference to current report no 23/2007 dated 20 March 2007, the Management Board of Multimedia Polska S.A. announces that on 24 August 2007 Multimedia Polska S.A. ("the Company", "Multimedia") received a decision by the President of the Office of Electronic Communications no DRTN-WWM-60600-34/07(21) amending the Agreement on Network Interconnection dated 8 August 2006 concluded by and between Telekomunikacja Polska S.A. ("TP S.A.") and Multimedia ("the Decision").

The Decision amends the Agreement in such a manner that it introduces the flat-rate model for interconnection charging, which will allow Multimedia Polska to reduce the cost of carrying domestic voice traffic over TP S.A.'s networks. The terms and conditions set out in the Decision are similar to those set out in several other decisions previously issued by the President of the Office of Electronic Communications for other operators.

Legal basis:
